

Student 1-1

REALQ REPORT

Overview: Student 1-1 shows solid critical thinking and problem-solving skills, clearly identifying real problems and reasoning through why they matter. Creativity is still developing — encourage exploring more original angles rather than familiar ideas.

Performance Evaluation

Parameter	Rubric Level	Evidence from Student Work
Critical Thinking	Scale 3	Identified a specific, real problem (snack wrapper waste) and clearly explained who it affects.
Creativity	Scale 2	Proposed a workable idea but leaned on a familiar concept rather than a fully original angle.
Problem Solving	Scale 3	Explained clearly why the problem matters and who it affects, showing real problem-framing skill.
Decision Making	Scale 3	Reasoned through the consequences of leaving the problem unsolved before concluding it was worth acting on.

Baseline Assessment Overview

3							
2							
		Critical Thinking	Creativity		Problem Solving	Decision Making	
		Scale 3	Scale 2		Scale 3	Scale 3	

Performance Level:

Scenario-Based Assessments

Question 1

Describe one real problem you have noticed at your school or in your neighborhood, and explain who it affects and why it matters.

RESPONSE ANALYSIS

Critical Thinking

Scale 3

Clearly identified snack wrapper waste as a real, observed problem affecting the whole school.

Question 2

Explain why the problem you described is important enough for someone to want to solve it.

RESPONSE ANALYSIS

Problem Solving

Scale 3

Connected the problem to real costs (cleanup, wasted resources) rather than just restating it.

Decision Making

Scale 3

Reasoned about consequences of inaction before concluding the problem was worth solving.

Summary

Student 1-1 shows solid critical thinking and problem-solving skills, clearly identifying real problems and reasoning through why they matter. Creativity is still developing — encourage exploring more original angles rather than familiar ideas.
